

The new Wet Gate for MWA Vario provides a real-time dust and scratch removal during scanning 35 mm historical film material furthermore it is fully controlled by the MWA flashSuite 2 software.

The design will address the needs of film archives to handle a wide range of historical and aged Film. The special designed drying plates on the exit of the Gate guarantees a perfect dry film after the scanning, ready for getting back to the store.

In contrast to other existing Wet Gate systems the MWA Wet Gate provides a minimum of odor nuisance.
